

- Inner Liner
- Board
- Outer Wrap
- Automatic Creasing Line

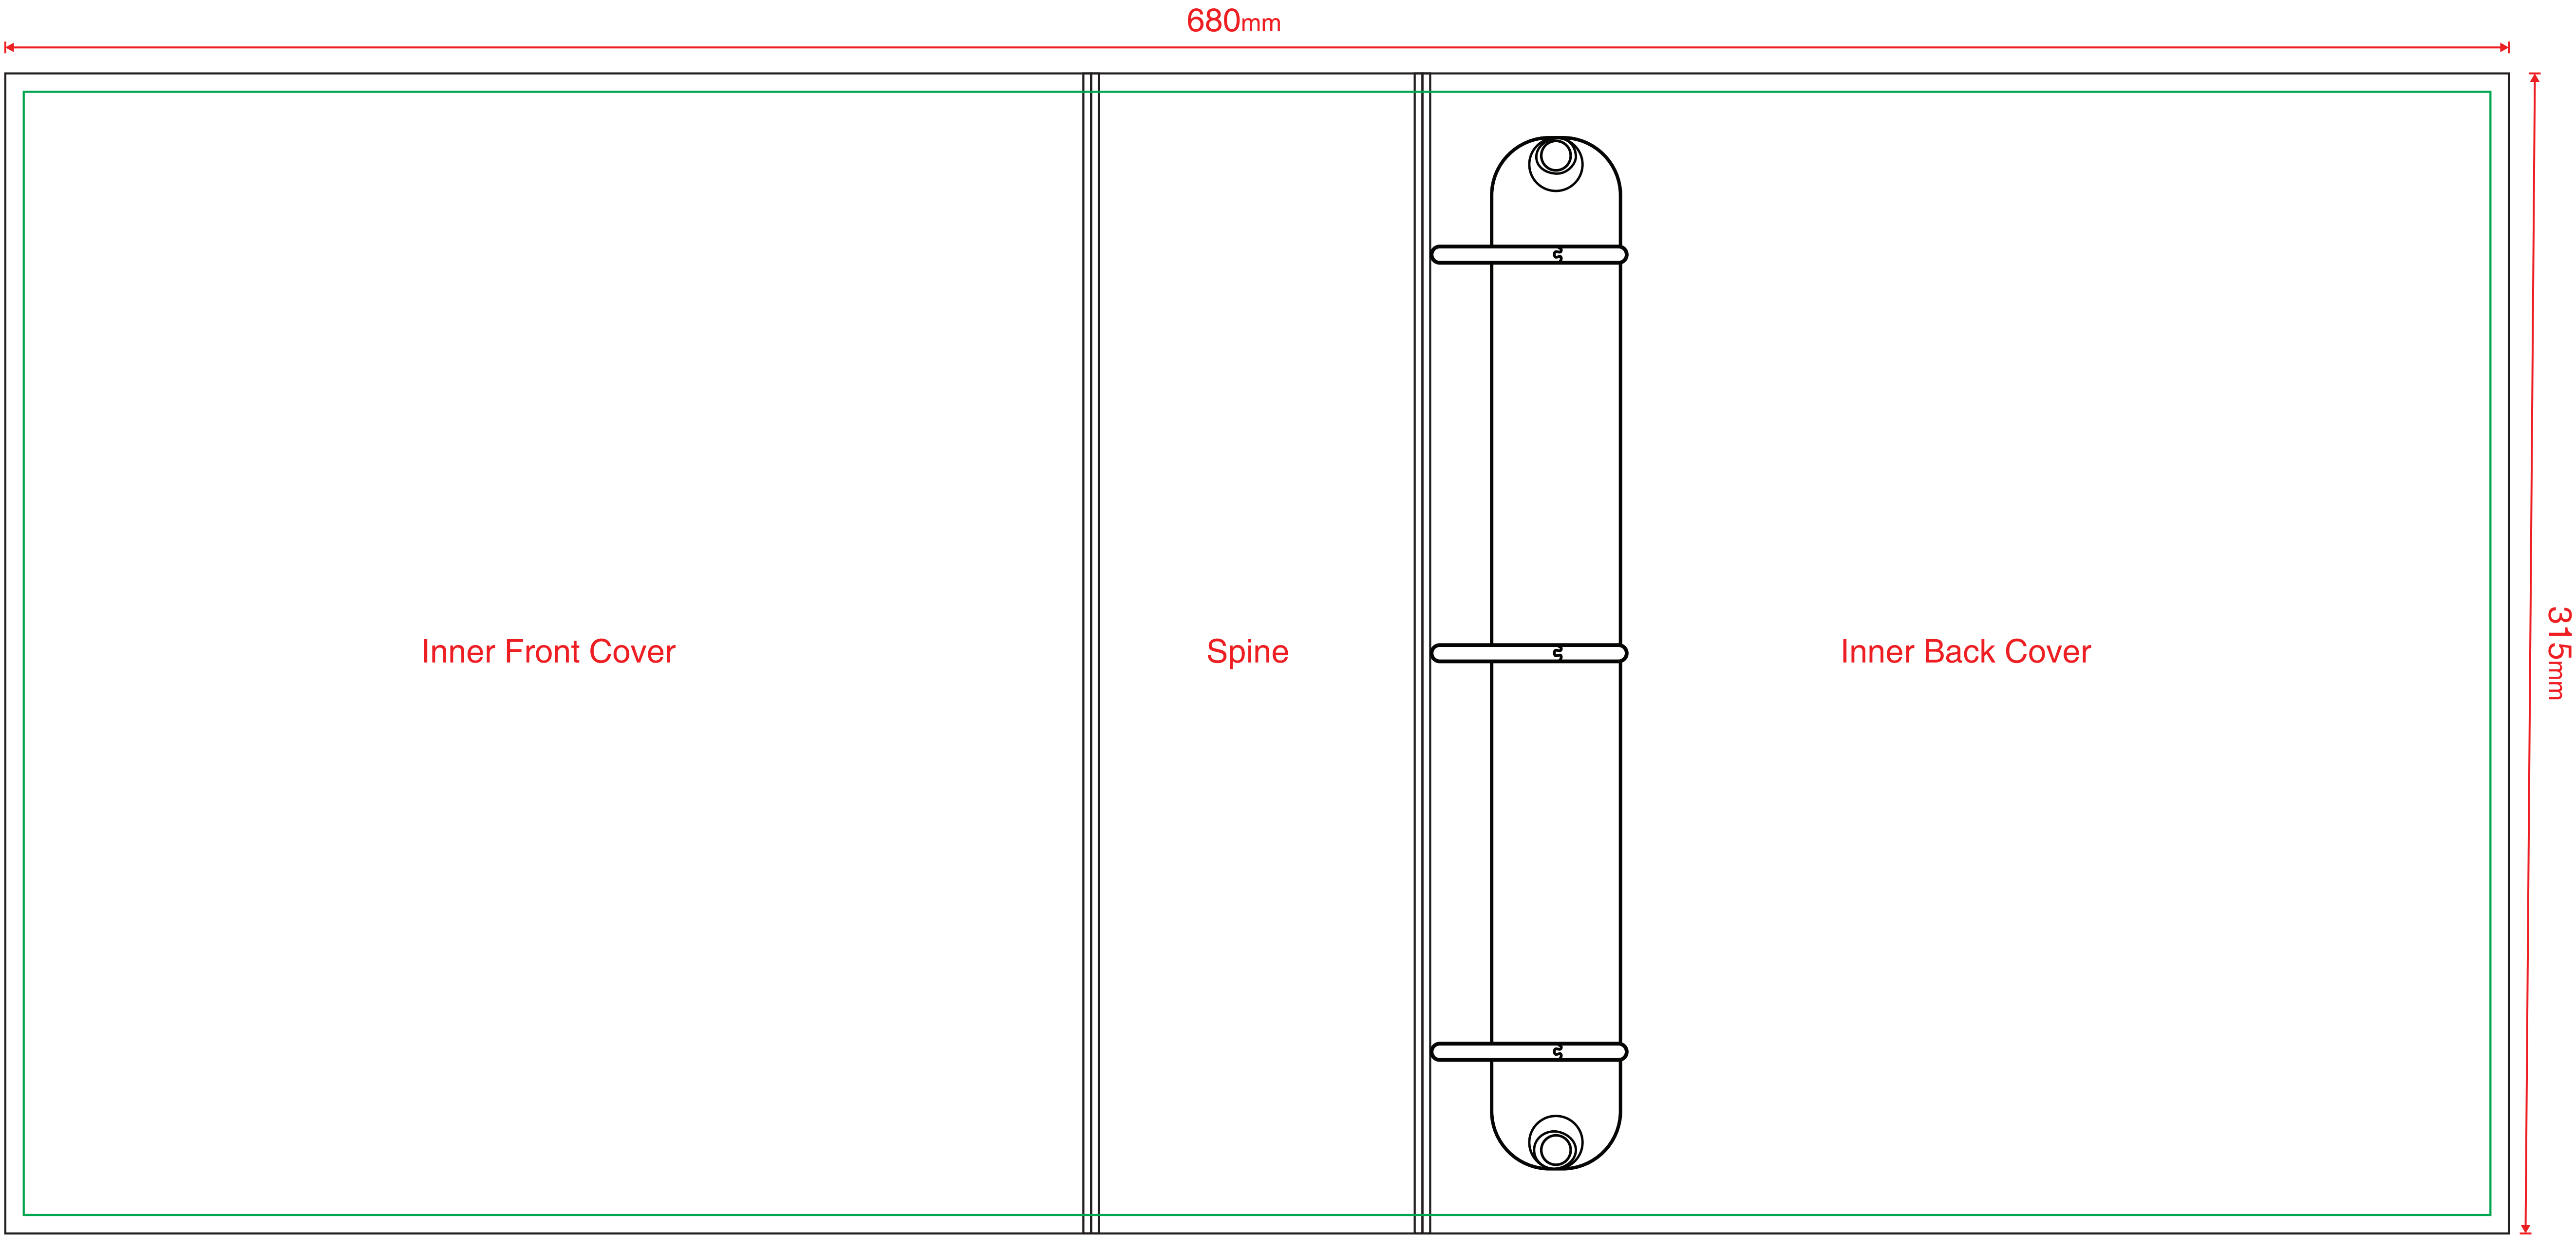

IMPORTANT

- If a full-size print is used on the outer, artwork in the turn-in area might not be fully visible, yet it's essential for a naturally inward-turning image.
- If a full-size print is used on the inner liner, please provide an additional 5mm bleed area on all sides.
- Ensure artwork is accurately positioned, such as centred to the spine or cover.
- Ring position may vary based on ring specifications.
